

### **VELA Eurasian Milfoil Activity Log**

- 2012 Treatment done in May, July, and August totaled 54 acres for Milfoil. More attention given to nuisance weeds like coontail (49.5 acres)
- 2013 Surveys performed in June, July, August, and Sept with treatments in June, July, and August. Treatments totaled 47.5 acres for Milfoil. Products used were 2,4-D, Triclopyr, and Diquat.
- 2014 Surveys performed in June, July and August with treatment in June and August. Treatments totaled 83.5 acres for Milfoil, 54.5 acres for nuisance native plants and 5 acres for nuisance algae growth. Products used were Navigate, Renovate OTF, Sculpin G, Clipper, Chelated Copper, Hydrothol, and Diquat
- 2015 Surveys performed in June, July, Sept with treatment performed with herbicides in July, July (twice), and August. No EM found until August, when small amount discovered within a treatment zone for natives, so EM most likely controlled by chemical used for them (Diquat). Treatment plan included 44 acres of algae control, 26 acres for eel grass, and 63 acres for Pondweeds.
- 2016 Surveys performed in June, July, and August. No EM found until July along with algae and native plants – 11 acres EM treated in July plus 40 acres algae and natives. In August, no new EM found, but more native infestation so treatment followed in September, along with algaecide for the entire lake shoreline (108.5 acres).
