

LAKE PHOSPHORUS RESULTS 2017
Spring and Late Summer Readings
(parts per billion recorded)

April 11, 2017: Cloudy – water turbid from recent rain – reading 28 ppb

September 8, 2017: Partly cloudy – water temp 62.6 degrees F – reading 23 ppb

** 10 year average spring concentration is 24.2 ppb

** 10 – 30 ppb range indicates a mesotrophic lake (having a moderate amount of dissolved nutrients)
